

VisiPatch® 360 4-Pair Cutting Tool Kit Instructions

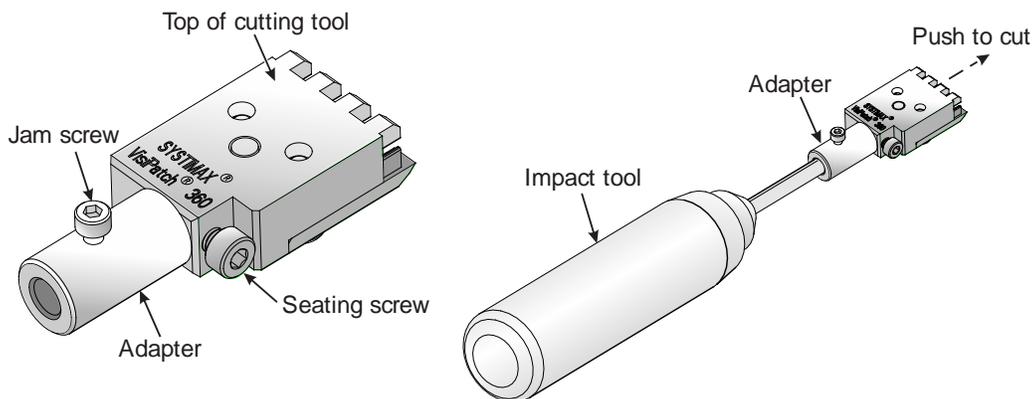

General

The **VisiPatch® 360** 4-pair cutting tool kit is used to seat and cut conductors on the **VisiPatch® 360** wiring block.

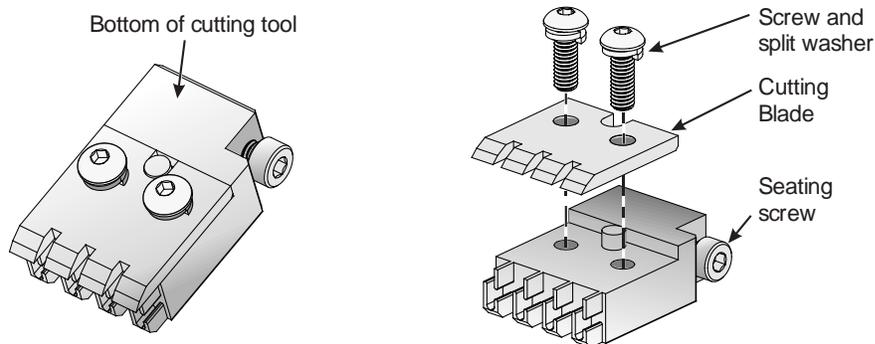

1. **CommScope** has designed the **VisiPatch** seating and cutting heads to work with most readily available impact tools on the market. **CommScope** recommends using the Paladin PA3561 impact tool handle.
2. **VisiPatch® 360** 4-pair cutting tool is shipped with an adapter that attaches to the impact tool (ordered separately). Remove the other cutting head from impact tool and replace with the VP360 4-pair cutting tool.
